IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER Monitoring Requirements Not Met For Village Of Magdalena

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda

Our water system violated drinking water requirements over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we are did to correct these situations.

We are required to monitor your drinking water specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During August 2024 we failed to conduct required source water monitoring within the designated timeframe, following a Total Coliform-positive sample and, therefore, cannot be sure of the quality of our drinking water during that time.

What should you do?

There is nothing you need to do at this time.

What does this mean?

One requirement of public water systems is the periodic monitoring of tap water for the presence of bacterial contaminants. Whenever our water system has a routine Total Coliform-positive sample, we are required by law to conduct source water monitoring within 24 hours of notification. Following a Total Coliform-positive sample on August 16, 2024 we did not collect the required source water sample within the timeframe designated by the state. Therefore, we cannot be sure of the quality of your drinking water during that time.

What happened? What is being done?

For more information, please contact Richard Rumpf at 575-854-2261 or PO Box 145, Magdalena, NM 87825.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail
